## Specification & Notes

### Tight Funky Kit

#### Production Notes for Multi-track Users:

Channels: 13

- Kick Inside
- Kick Outside
- Kick Sub
- Over Snare
- Under Snare
- Hats
- Rack Tom
- Floor Tom
- Overhead Left
- Overhead Right
- Overhead Ribbon
- Room Valve - Large Diaphragm Condenser
- Room Stereo

- **All multi-tracks are as recorded.** IE: at unity gain with no processing. Nothing has been moved, polarity switched or phase-aligned.
- **Experiment with phase/correlation on room mics** - this can have negative or positive effects depending on many factors in your mix. Play around and experiment, just be aware that you can run into phase problems with these channels.
- **Sub kick** - Products from The Beat Shed sometimes come with a sub-bass channel - often on the kick drum. **This is heavy stuff!** You will probably want to low-pass/high-cut this channel quite aggressively, and even then, probably use it quite sparingly - it is a useful colour to add to a mix, not necessarily a main component. **But hey... no wrongs or rights, go experiment!**

## Specification & Notes

### Tight Funky Kit

There is a Song Pack (ButterNut Funk) related to this Beat Package. Uptight. Awkward. Funky as HELL.

12 funky drum song song slices at 115bpm – verses, choruses, breakdowns... and more.

[Check it out here.](#)
